BatchMaster ERP for
Personal Care
& Cosmetics

Adorn your cosmetics manufacturing business with a touch of profitability

BatchMaster ERP for Personal Care & Cosmetics

Operating in the ever-changing personal care & cosmetics manufacturing industry comes with a specific set of challenges. This industry demands continuous innovation, besides assessment of quality at every stage- right from the procurement and storage of materials, to manufacturing and distribution of the end product. The manufacturers in this industry are often caught between balancing the constantly changing regulatory requirements on the one hand, and their own long-term financial viability on the other.

The way forward for them, in such scenario, is to get rid of working with disparate systems, or paper-based processes, and to develop the capability to run their business from one centralized platform. So, whether you private-label, contract manufacture, or produce your own line of personal care & cosmetics products, to excel in this era of cut-throat competition, you require a robust software that can handle new product development, formulation tracking, real-time costing, quality & compliance, and complete financial management. You need, BatchMaster ERP Software for Cosmetics.

BatchMaster ERP for Personal Care & Cosmetics

BatchMaster ERP for Personal Care & Cosmetics is a purpose-built solution that successfully adapts your business processes to the market requirements, in an agile & flexible manner. Whether it is saving costs through integrated processes, innovating modern hybrid formulas or managing scores of formulas, handling sales, purchase, inventory and production, meeting quality standards, formulating planning, scheduling, and traceability strategies, or adhering to **cGMP, OSHA, HAZMAT** and all other regulatory requirements, BatchMaster's **cosmetics ERP** helps address your unique manufacturing requirements.

Available on premise, web and in the cloud, BatchMaster **Cosmetics ERP Software** caters to the industry sub-verticals such as fragrances, hair care, skin care, soap, sanitizers, injectable, and diapers, helping the businesses in these micro-verticals stay competitive in the era of disruption. Its implementation results in improved efficiency, better decision making, enhanced quality standards, reduction in operational & compliance costs, improved management reporting & analysis, and ability to rapidly develop new products that are high-quality, and cost-effective.
